## Living Waters for the World

In Honor of: \_\_\_\_\_

Given by: \_\_\_\_\_

Living Waters for the World (LWW) is a global mission resource of the PC(USA) that fosters long-term, mutually beneficial, relationships between volunteers and communities, as it provides sustainable, clean water in places of need. LWW partners with communities to develop a sustainable solution for providing clean water. By using a water treatment system that is simple and affordable, LWW and its trained volunteer teams help communities take ownership of their health and well-being. A typical water filtration system costs about \$6,000.
